

Hi,

I have tested multiple cases for this mini project. As I used English Alphabet which lower case and upper case. I have run some couple tests to check debugging process as well.

Case 1: lower case only

```
Please input below::  
hello  
User input is:: hello  
After eliminating, we have remaining English Alphabet as:: AaBbCcDdEeFfGgHhIiJjKkLlMmNnOoPpQqRrSsTtUuVvWwXxYyZz  
Length of result is : 48
```

Case 2: Upper case only

```
Please input below::  
HELLO  
User input is:: HELLO  
After eliminating, we have remaining English Alphabet as:: AaBbCcDdEeFfGgHhIiJjKkLlMmNnOoPpQqRrSsTtUuVvWwXxYyZz  
Length of result is : 48
```

Case 3: Upper case and lower case

```
Please input below::  
Today is better  
User input is:: Today is better  
After eliminating, we have remaining English Alphabet as:: ABCcDEEFfGgHhIiJjKkLlMmNnOoPpQqRSUuVvWwXxYZz  
Length of result is : 41
```

Case 4: Upper case – lower case – space – number as well

```
Please input below::  
I am 33 years old  
User input is:: I am 33 years old  
After eliminating, we have remaining English Alphabet as:: ABbCcDEEFfGgHhIiJjKkLMNnOPpQqRSTtUuVvWwXxYZz  
Length of result is : 42
```

Thanks for your time.
